MAY 3rd

Belgrade Departure

Embark on an Unforgettable Journey of Transformation and Empowerment!

Set sail on the majestic Danube River and dive into the enchanting world of media magic. Over ten inspiring days, we'll navigate through digital, media, technology, and creativity, turning ordinary skills into extraordinary abilities.

First stop: Subotica

Second stop: Novi Sad

Third stop: Belgrade

Why Join the Peace of Mind Voyage?

Transform

Transform how you engage with the world. Our program aligns with UNESCO's goals and empowers you to think critically about media content, recognize biases, and assess credibility.

Empower

Take charge of your learning journey. Gain cutting-edge media skills, unleash your creative potential, and make a meaningful impact on the world.

Elevate

Embrace the future of media by integrating innovative technologies like AI, AR, and digital tools into your education.

Media and digital education isn't just about understanding media —it's about transforming how we engage with the digital landscape. Aligned with UNESCO's goals, it empowers you to think critically about digital media content, recognise biases, and assess credibility in an age overflowing with information. You'll gain both media and digital literacy skills to consume and create responsibly, using digital platforms as powerful tools for democratic engagement and social change.

Transform your learning experience with **EDUCATE**: Master the Art of Digital Media Alchemy! Dive into our exciting program designed to empower you with cutting-edge digital media skills and unleash your creative potential in the digital realm.

ELEVATE highlights the transformative impact of integrating innovative digital technology into media education. It's all about taking your learning experience to the next level and embracing the future of digital media!

EMPOWER emphasises personal empowerment through media and digital education, underscoring its alignment with UNESCO's goals. It's all about taking charge of your learning journey and making a meaningful impact on our digital world!

By immersing yourself in this program, you'll not only master the tools of digital media but also become a catalyst for positive change in the digital sphere. Whether it's crafting compelling content, engaging in thoughtful digital dialogue, or leading innovative projects, you'll be equipped to navigate and shape the ever-evolving digital landscape with confidence and creativity

Why is our EEE program perfect for high school students, their teachers, university students, and young experts together?

Because magic happens when diverse minds collide! High school students (up to 18) bring fresh perspectives and boundless creativity. Teachers (30+) offer wisdom and guidance from years of experience. University students and young experts (19-29) infuse innovation and cutting-edge insights.

By uniting these groups, we create a dynamic learning ecosystem where everyone learns from each other. Together, we dive into media and digital education aligned with UNESCO's goals—mastering critical thinking, digital literacy, and ethical awareness. It's not just about individual growth; it's about collaborating to shape a media-savvy, empowered society.

AI: Artificial Intelligence can personalize learning by adapting content to meet individual learners' needs, fostering critical thinking by providing diverse media perspectives and encouraging deep analysis. AI tools can help students evaluate media credibility, identify biases, and understand complex media ecosystems, thus enhancing media literacy and empowerment.

Generative AI: This technology can be used to explore media creation tools, allowing students to engage creatively with media content. By generating unique media outputs, learners can better understand media production processes and the role of AI in content creation. This supports digital skills development and encourages ethical considerations regarding content generation and the use of AI in creative industries.

What Awaits You?

Workshops

Hands-on sessions across various media forms—news, radio, TV, film, and animation.

Mentorship

Learn from media maestros and industry leaders who will guide you through your alchemical transformation.

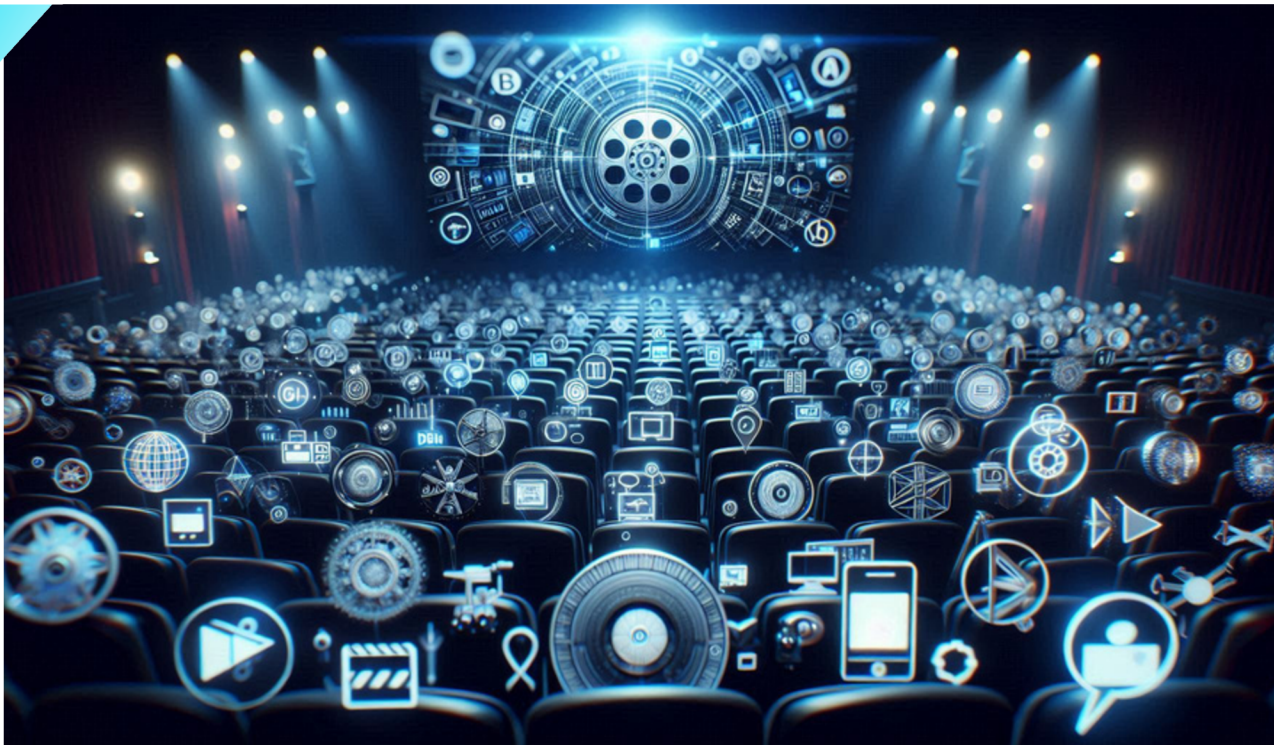

Exploration

Experience the rich heritage of Belgrade, Subotica, and Novi Sad while sailing along the beautiful Danube.

Networking

Connect with like-minded individuals passionate about media, creativity, and social change.
